

How and Why to Cherish Your On-Lot Septic System

Onsite treatment advice

Onsite sewage disposal (a.k.a. on-lot septic) can be a cost-effective, environmentally friendly option for sanitary living in a rural setting. But proper care and system maintenance is crucial to your home's value and our environment's health. Roger Lehmann, sewage enforcement officer and principal of the engineering firm All County and Associates, will address this unpleasant topic with easy-to-understand advice (as well as a dirty story or two).

- ▶ How sewage treatment keeps us safe.
- ▶ Key differences between on-lot and public systems.
- ▶ Simple steps to ensure your system functions as intended.

- ▶ The cost of failure; regulations and responsibilities

Stay informed today to avoid a costly and unnecessary expense in the future.

When: Sept. 28, 2020; 7:30-9pm

Where: Online via Zoom (meeting ID# 868 9703 5337) or phone (929-205-6099)

Details will also be posted at lowerfrederick.org in September. Pre-registration is not required, but you can submit a question in advance by emailing EAC@LowerFrederick.org or calling the township at 610-287-8857. No Zoom access? Tell us so we can accommodate you. This event will also be recorded for viewing later.

Brought to you by the [Lower Frederick Township](http://LowerFrederickTownship.org) Environmental Advisory Council. Presentation will follow a short EAC monthly meeting, which will begin at 7pm.
