

Lower Frederick Township Parks Tree Donation Program

*Help restore the canopy
or honor a loved one,
special occasion, or a
milestone, with the
living tribute of a
tree.*

Help restore the natural beauty and health of our community parks by providing for a tree. You can also honor the life and legacy of your loved one with your tree.

These initial plantings will help replace the trees we lost to the emerald ash borer at Village Center Park located in front of the Zieglerville CVS.

The replacement trees will be a mix of native hardwood species or naturalized cultivars selected to provide a diverse, resilient habitat that will help support the life cycles of our local wildlife and pollinators.

Your tax-deductible donation of \$750 will pay for the selection and purchase of a 1½ to 2" diameter tree, professional planting, mulching, and maintenance while the tree gets established. Each donation will also include an engraved 3¼" x 4¾" aluminum plaque stake mounted at your tree. If you wish, this plaque can be personalized with your memorial message identifying your donation at no additional cost.

Each plaque will include the identification of the tree species along with your optional personal dedication statement. Each tag will have a Quick Response Code (QR Code) which, when scanned with a mobile device, will take the reader to additional information about the tree and its benefits to the environment.

Individuals, companies, or groups may donate.

Please use the attached order form to make your donation.

*Thank you for supporting
our community!*
