

Sewer Work in Fulmer Road to begin near the end of October!

In late October, sewer construction contractor DOLI Construction plans to begin installation of sewer pipes and manholes in Fulmer Road. Work will begin at the intersection of Fulmer Road and Riverside Avenue, proceeding northwest along Fulmer Road.

Property owners with house numbers 204 Fulmer Road through 239 Fulmer Road can expect a letter from the Township in coming days regarding sewer lateral location. The Township will have a stake placed along the front of each property by a surveyor. The stakes will identify the proposed design location of the sewer lateral stubs. We ask that you **do not relocate or remove these stakes**.

We recognize that a different location may work better based upon where the plumbing currently leaves your home, or may reduce impacts from excavation to existing landscaping, driveways, or natural features. **DO NOT MOVE THE SURVEY STAKE!** The letter will describe how to contact the Township about setting a stake for your preferred location.

Other property owners in the project area will receive letters from the Township when work is scheduled in the vicinity of their properties. Thank you for working with us to make this a successful project!
